MEMORANDUM FOR THE RECORD

FROM: Helene L. Boatner  
Chief, Product Evaluation Staff

SUBJECT: Visit of SSCI Staffer

Peter Sullivan, acting Minority Staff Director for the SSCI, came out on 10 July to read several PES studies. He read the ones on current intelligence and third world military analysis and plans to return to finish the one on East-West issues and to discuss some of the findings and the implementation of our recommendations. He made few substantive comments but did say he was impressed by how forthright some of our comments were--particularly on sloppy language and wishy-washy judgments. He was also struck by the problem of access to information on US policies and options. And he commented that it would be useful if some of our studies could be made more widely available.
